Subject:	PCC Risk Management
	Provide advice and recommendations to the PCC and Chief Constable in relation to the effective development and operation of risk management
Report by:	Paul Benfield
Reporting Organisation	PCC
Number of Appendices:	None

Summary

Attached with this covering report are the updated PCC Risk Management Framework and the Revised Strategic Risk Register Report, which fits with the framework.

The Risk Management Framework was last updated in 2016. The OPCC has taken the opportunity to review the Framework and to move towards a reporting structure where Strategic Risks are reported to the PCC and JASC for consideration. The Framework is designed to capture risk and make sure that the focus is placed on those risks which are most likely to impact on the PCCs ability to deliver services.

To complement this approach there is a Strategic Risk Register Report which will be brought to each JASC meeting. This report provides the JASC with an update on the Strategic risks which have been identified by the OPCC, and an update on the actions that are being taken to mitigate those risk.

Action Required:

Consider the PCC Risk Management Framework and make recommendation to the PCC as to whether it provides effective framework for risk management and whether it should be adopted.

Review the content of the Strategic Risk Register Report and consider whether it provides assurance that the key risks facing the PCC are being identified and appropriately managed.
